EV800 Series

EV800 Series charger stations provide reliable, safe EV charging in all conditions.

Available as a single pedestal, dual pedestal, or wall mount charging station, the 1/4" gauge steel bollard protects your investment and is impact resistant.

Each charger features the same fully weatherproof, adjustable output with 18-foot or 23-foot cables and galvanized steel construction. The EV800 Dual Bollard can charge 2 vehicles simultaneously at full power.

The EV810 charging station is wind, rain, snow, sleet, ice, cold and heat resistant, making it ideal for indoor or outdoor installation. It meets or exceeds NEMA 4X, NEC 625, SAE J1772 standards and is ETL and cETL listed.

Commercial charging solutions

EV2000 Series

The EV2000 can charge compatible vehicles to 80 percent in as little as 30 minutes. Manufacturers are building more electric vehicles with DC charging capability to provide more convenience and faster charging to their customers.

The compact, lightweight design can be pedestal or wall-mounted and can be operated as a standalone unit or connected to an OCPP compatible back end network. The 25kW EV2000 can reduce installation costs by only requiring a 240V circuit compared to other stations needing a 480v 3 phase circuit .
